

Detachers

These detachers provide an easy and efficient method of removing hard tags from any tagged goods. Their superior strength means they are compatible with tags using a high strength clutch locking mechanism, as found in most hard tags in the product range.

Ultra Detacher (Super Lock)

The ultra detacher is a three piece detacher that can be installed into, or onto a counter top. The detacher is high strength and can be used with nearly all magnetic release hard tags available. It has a lockable lid, preventing it from being used illicitly. This lid incorporates a manager's key which stops it from being removed without it, therefore preventing illegitimate use.

Product Specifications

Diameter: 82.5 mm (3.2 in)

Height: 40 mm (1.5 in)

Weight: 355g

Magnetic Strength 12,000GS

Product Code: 3059-890 - Supplied in individual units.

Universal Detacher (Super Lock)

The Universal Detacher is a cost optimised detacher solution, capable of detaching most superlock and standard strength hard tags. It can be counter mounted if required.

Product Specifications

Diameter: 95 mm (3.7 in)

Height: 30 mm (1.2 in)

Weight: 860g

Magnetic Strength: 10,000 GS

Product Code: 3089-890 - Supplied in individual units.
