

easigate 58

58 kHz AM EAS System

The easigate 58 is an Acousto-Magnetic EAS System that is compatible with all 58kHz tags and labels in the market. Panelling is plain white. Alternatively, the panelling can display a permanent retailer logo or message. All electronics are contained within the pedestal, meaning no external power pack is required. The easigate 58 can be configured as a mono or a dual system for optimum performance.

Features

- Self Contained Electronics for easy installation
- Customised logo or plain.
- Configured in a Single or Dual System
