

# easicap

## Bottle Protection

The **easicap** offers reliable re-useable theft protection for premium wines and spirits. Bottles can be openly displayed and protected with a strong visual theft deterrence with or without alarm activation at the exit. **easicap** is available in Acousto-Magnetic and RF technologies and offers the ability to merchandise products with confidence. If your stores do not have anti-shoplifting systems installed, then the non-alarming **easicap** is ideal for "benefit denial", as it is virtually impossible to remove or destroy the **easicap** without the proper detaching device.

The **easicap** has a low profile, allowing bottles to be merchandised in standard shelf spacing. The clear cap cover allows customers to examine the entire bottle before purchase. Virtually all bottled merchandise can be protected, including wine, spirits and champagne, with one of three available sizes. **easicap**'s Teflon coated contact surfaces assures there will be no damage to caps or bottles. The secure one-hand removing device is quick and easy for fast customer service at busy checkouts.

New flared version with fin enables easier twist and turn on application.

## Features

- Integrated EAS alarms exit systems
- Teflon coated contact areas protect merchandise
- Extra strength lock with encapsulated three ball locking mechanism
- Strong construction made of scratch and tamper resistant material; clear durable plastic keeping bottle seal visible
- Simple to attach and easily removed with a magnetic detacher
- Benefit Denial means it can be used independantly from EAS system
