

Remote Sounder

The remote sounder / alarm can be connected to any EAS system to enhance the audible alarm of an EAS antenna. It is designed for stores with a large level of noise, such as music stores or a large environment such as supermarkets or department stores/ In addition, the remote sounder incorporates an alarm centre with LED display to enable alarm activation to be monitored.

Features

- Integrated Alarm Counter
- Compatible with all TAG Company systems
- Message or tone alarm capability
- Integrated audible and visual notification
