

# Self Seal Tag (SSTAG™) RF

## 8.2 MHz RF Soft Tags

The Self Seal Tag RF is used to protect items from theft by combining an Radio Frequency (RF) EAS security tag with a plastic over-wrap, printed with the words “Security Protected”. The Self Seal Tag is used to seal product in its packaging, preventing would-be thieves from opening the box and removing the item.

### Features

- The Self Seal Tag provides tamper protection.
- Safeguards the EAS label against illicit removal.
- It offers a strong visual deterrent but remains a discreet form of protection.
- Easy and quick de-activation of the Self Seal Tag at point of sale offers efficient security and quicker customer service.
- The Self Seal Tag can protect CDs; DVDs; software, games, boxed items (fragrances, jewellery), packaging with rounded surfaces, sunglasses, computer accessories and shoes.
- Self Seal Tag is made from a biodegradable plastic wrap to ensure an environmentally friendly loss prevention solution.

Self Seal Tag RF
