

Self Seal Wrap RF

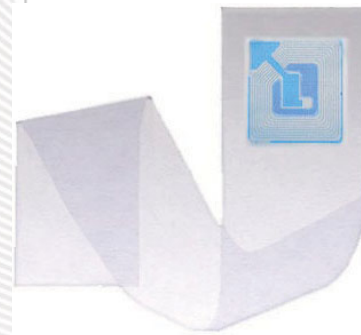

8.2 Mhz RF Soft Tags

The Self Seal Wrap RF is used to protect items from theft by combining a Radio Frequency (RF) EAS security tag with a plastic over-wrap, printed with the words “Security Protected”. The SS Wrap is used to seal the consumer product in its packaging, preventing would-be thieves from opening the box and removing the item.

Features

- The Self Seal Wrap provides tamper protection and safeguards the EAS label against unwanted abuse.
- It offers a better visual deterrent and still remains a discreet form of protection.
- Aesthetic: it looks good on the shelf and doesn't compromise the packaging
- Easy and quick de-activation of the Self Seal Wrap at point of sale offers efficient security and quicker customer service.
