

# series 8.2

## S60 Class Shoe Label

### 8.2 MHz RF EAS Labels

Designed specifically for the integration into shoes. Double capacitors and perforated tracks which will break once the shoe is used, ensuring no reactivation of the label.

Series 8.2 provides users with high quality, high performance EAS anti-theft self adhesive labels. These labels are fully compatible with all 8.2MHz systems and deactivators, regardless of manufacturer.

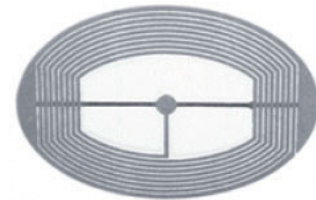

Series 8.2 labels have been engineered and manufactured to meet stringent quality and performance specifications for both retailers and source tagging manufacturers. Each label is precisely etched, laminated, processed, and placed on the release liner. Label specifications and manufacturing tolerances are tightly controlled. Each label is 100% tested to ensure quality.

## Features

- 100% Compatible with all 8.2MHz systems and deactivators
- Product Specifications (Amplitude, Frequency, and Q) yield outstanding detection and deactivation performance
- Aggressive hot melt rubber-based adhesive

## Product Specifications

Label Size (MD x TD)	38 x 56mm
Resonance Frequency	8.2MHz ( $\pm 4\%$ )
Quality Factor	$Q \geq 75$
Deactivation Field Strength	0.9A/m-1.7A/m
Quantity per Roll (standard)	1,000pcs
Cardboard Core Inner Diameter	76.2mm
Labels per Box	20,000 Labels
Box Gross Weight	17.5kg
Box Dimension	62cm x 33cm x18cm
